

## **QinetiQ Email Accounts for New Hires**

For QinetiQ employees hired during or after May of 2008, email sent to your QinetiQ-NA.com corporate accounts will not be forwarded to your ELVIS nasa.gov account. In order for those affected employees to access their corporate email account, QinetiQ is providing web mail access at <https://msgwebmail.qinetiq-na.com>.

NOTE: This affects employees hired during or after May of 2008; each employee will be notified individually if this change affects them. Email accounts that were being forwarded prior to this date will continue to be forwarded.

QinetiQ servers and clients are running Anti-Spam protection provided through Barracuda 300 series, and anti-virus protection provided through Symantec Anti-Virus Enterprise. However, ELVIS IT would like to remind employees to practice responsible computing while using NASA provided machines, operating on NASA networks, to avoid email spam and viruses. For tips to avoid specific threats to information systems security, refer to the Basic IT Security training available in SATERN <https://saturn.nasa.gov>.
